## Experience

### (BHEL) Bharat Heavy Electricals Limited

*Trainee Web Developer*

*Jul 2020 – Aug 2020*

At BHEL, I collaborated with the IT Department to enhance the Build and HR Management System. I implemented UI trends, wireframes, and user journeys for improved user experience. I contributed to backend development, documentation, and conducted user research. I introduced efficient system for handling concepts for improved performance.

### Greenbhumi

*Web Development Intern*

*Jan 2023 – Apr 2023*

I developed a Web Application HRMS (dashboards), worked on both front-end and back-end to improve user experience on the application. I utilized the latest technologies, such as PHP8 and MySQL for backend development and utilized various modules for different dashboards, and Built the website and enhanced it and made its UX easy to use.

### Web Development Lead

*Apr 2023 – Jul 2023*

In continuation due to your worthy performance and utmost dedication, I was promoted to a Lead role where, I lead a team of developers in designing, developing, and building Dynamic web applications using fully functioning. Conducted regular code reviews to enforce coding standards and best practices to make the system more efficient and enhanced the UX of there dashboards. Collaborated with cross-functional teams to gather requirements, create project plans, and ensure timely project delivery.

## Projects

### Placement Module Development in a ERP System

Created a Web-based ERP System for placement management. It streamlines the entire placement cycle, including interview scheduling, candidate selection, student testing, and job offer issuance. The system also predicts eligible companies for students within the ERP framework.

### HRMS System

Professionally built HRMS system using HTML, CSS, Bootstrap, PHP, and MySQL. Designed user-friendly interfaces and implemented efficient functionality. Developed a comprehensive solution for automating HR processes and improving efficiency.

### Labor Management System

Created a Software which refers to the expectation for companies to operate in compliance with legal and customer requirements for providing the fair workers, for creating safe and humane working conditions.

### Simon Game

Created "Simon Game" using JavaScript for an interactive and challenging gaming experience. Implemented pattern generation, user input tracking, and feedback.
